aircraft spare part and inventory management...

...engines, avionics and rotable parts supply
Global Fleet Management offer fast access to the parts you need when you need them.

Global Fleet Management are leading suppliers of engines, avionics and rotatable parts for ATR42, ATR72 and BOMBARDIER aircraft and have a powerful presence on the BOEING and AIRBUS markets. We have a dedicated, 24-7-365 AOG team ready for any airline emergency situation.

We also understand that running an airline is a hugely expensive, capital intensive business. Therefore, we offer opportunities for airlines to reduce capital outlay through pooling and even to generate an additional revenue stream through consignment.

Of course, in our industry safety, quality and reliability are of paramount importance. Global Fleet Management take their obligations to you in these areas very seriously. We are ISO 9001 certified for “Aircraft Sourcing and Supply Chain Management Services”.

Global Fleet Management have close working relationships with carefully selected partners and can provide the following services:

- Aircraft engines and spare parts supply.
- Repair through a network of approved repair stations providing preferential pricing and turnaround times with quality guarantees.
- Local language customer service thanks to a group of strategically-located airline relationship managers.
- Stock consignment and pooling through an affiliate of financiers.
- Safe delivery of orders on-time, every time thanks to a network of global logistics engineers.

Inventory management to keep your aircraft in the air and your finances in good shape
Rapid supply of parts

Global Fleet Management’s Rapid Response Programme will ensure you get the parts you need, when and where you need them, at the right price and in the right condition. We can provide fast access to quality parts for ATR, Bombardier, Boeing and Airbus aircraft. To ensure availability, we draw on parts from a wide variety of sources: our own stock; authorised distributor partners; OEMs; and our own Airline Alliance Parts Programme, through which participating members get access to one another’s stock list and benefit from one huge pool of assets.

Having the part in stock is just the start; it still needs to be delivered to you quickly and reliably. Global Fleet Management’s logistics experts work in close partnership with world recognised specialist logistics service providers to ensure rapid and safe delivery. We leave nothing to chance: All parts are checked and photographed, and all documentation is rechecked before passing through the final quality assurance procedures.

Efficient repair management around the globe

You can relax in the knowledge that Global Fleet Management, with more than 60 repair stations around the world, all offering a reliable, high quality service, has a partner to attend to any repair requirement with maximum importance given to AOG situations. To make sure your repairs run smoothly, we provide a complete inventory repair management service, with locations in London, Miami and Singapore. The specialist teams at these locations will keep you updated on the status of the repair through step-by-step reports and will ensure the unit is repaired, certified and returned as quickly as possible. This service, combined with our exchange pool service, allows airlines and inventory owners to maximise their potential revenue through exchange schemes.

Improving your access to parts and your profits

Making sure your airline has a ready supply of parts can place a significant financial burden on your business. Global Fleet Management’s consignment scheme can help generate another revenue stream for your airline.

Consignment

Global Fleet Management’s consignment scheme lets you turn your stock into a revenue stream. We will discuss your particular requirements and manage an exchange pool to suit you with guaranteed availability of your parts. Not only will you start to see an influx of revenue, but your stock will be kept up-to-date with fresh certification. All stock will be tracked and reports provided to keep you in the loop every step of the way. Our repair management service will ensure any core units are repaired quickly, to a high standard and, of course, returned to the consignment stock ready for the next exchange request.

AOG 24/7/365

In an Aircraft on Ground situation every second counts and that’s when we really prove our worth. Response is one of our core values and you will find that our team is dedicated to getting you operational again quickly and with a minimum of fuss. The flexibility of our team enables us to respond rapidly to deliver the parts you require. If you need ATR, Bombardier, Boeing or Airbus spare parts for your AOG situation, you can rely on Global Fleet Management.

Support for a wide range of aircraft

We help keep a wide range of aircraft in the air:

Airbus • ATR • BAE Systems • Boeing • Bombardier • Cessna • Embraer • Fokker • Gulfstream • McDonnell Douglas • SAAB
Quality assurance

Quality and reliability are two of our core values. We are committed to continuous improvement in these areas. We constantly monitor our performance and evaluate the systems and processes we use in our day-to-day work. Staff training is an essential element of the improvement process, not only in the area of quality assurance, but for the development of the Company overall. Quality and reliability in the processes we implement and the people we employ are critical to the success of our business. For this reason, we invest in both and are delighted that our investments have helped us secure ISO 9001 accreditation for “Aircraft Sourcing and Supply Chain Management Services”.

Maintaining our leadership position

Global Fleet Management also maintain affiliations with leading airline industry organisations to ensure we are always up-to-date with the latest markets trends and can respond to them quickly to guarantee you a cost-effective, comprehensive service. We are affiliated with:

- The International Federation of Airworthiness (IFA).
- The International Society of Transport Aircraft Trading (ISTAT).
- The Aviation Suppliers Association (ASA).
- The European Business Aviation Authority (EBAA).

Values

Our mission is supported by our core values of Family, Quality, Reliability, Flexibility and Response. We define our values as:

- Family - Core to our philosophy is the importance of a family dynamic with all of our partners. When you work with Global Fleet Management, you are a member of the GFM family and will be treated as such.
- Quality - In a global industry, in which millions of passengers and huge volumes of cargo depend on the quality and reliability of aircraft, we employ the most up-to-date quality management procedures and systems to provide you with the highest levels of quality assurance.
- Reliability - With a dedicated AOG team available anytime, we provide reliability you can count on. Release Certificates, ATA106, Non-Incident Statements, Trace Documentation, Logistics Management and around-the-clock care and attention to detail are all part of the service.
- Flexibility - We offer a personalized approach to allow maximum flexibility. We can provide exactly what you need, when you need it, without complex management authorisation procedures, extensive paperwork or other time-consuming obstacles.
- Response - Our Rapid Response Programme ensures that whatever the requirement, we deliver quickly and efficiently.
Global Fleet Management Corporation Ltd. specialist providers of engines, spare parts and inventory management for aircraft worldwide.
